Samantha,	
VHF did not work when approad Via satellite phone we contacted them on VHF when approaching the person answering the phone I was at the helm and when approached at maybe less than tried to reverse full speed on be turned sideways and ended up Iridium SOS. After approximate made reef. If you want to try to save Melocal safer place. Let me know how to proceed. Also, I will try to complete the form The Navy is waiting instruction. Please respond ASAP.	e crew member onboard in addition to me. We realized that the generator and the ching Santo Domingo, Dominican Republic. We could receive VHF but not transmit. It do Boca Chica Marina to secure a slip for repairs. As we had no possibility to contact give called via sat phone several times. The office was closed when we got closer and e only spoke Spanish but said they would meet us outside to assist in the approach. Proaching Boca Chica in the dark at about 6.30 pm there was nobody to meet us. We 2 knots knots from 1 nm outside when suddenly the depth rapidly became shallow. In oth engines but a wave from behind pushed us onto a man made reef. The boat half way on the reef. Swell from behind kept pounding the boat and we activated the lay 2 hours private people from shore helped us ashore via a small boat inside the man day we need to have permission to have the local Navy in Boca Chica, DR, to move it to form as soon as I can print. Right now I am at Immigration to process arrival papers.
Thank you, Martin Andersson
